

Assignment 5 on Javascript Operators

1) What is the value stored in `my_var` after the statement below is executed?

```
var my_result = 5 + 2 * 3 / 5;
```

2) Does the following expression evaluate to true or false?

```
(( !true ) || ( false ) )
```

3) What is displayed on the screen after all the statements below are executed?

```
var my_result = 3;  
my_result += 2;  
my_result *= 2;  
document.write(my_result);
```

4) Does the expression following the statements below evaluate to true or false?

```
var my_var1 = 3;  
var my_var2 = "3";
```

```
(var1 === var2)
```

5) Does the following expression evaluate to true or false?

```
!( true && false )
```

6) What is displayed on the screen after all the statements below are executed?

```
var my_result = "5";  
my_result += "2";  
document.write(my_result);
```

7) Does the following expression evaluate to true or false?

```
(( true && false ) || !(true || false) )
```

8) What is displayed on the screen after all the statements below are executed?

```
var my_result = 3;  
my_result = -my_result;  
my_result *= 2;  
document.write(my_result);
```

Assignment 5 on Javascript Operators

9) Does the following expression evaluate to true or false?

`((true && (4 > 5 - 2)))`

10) What is displayed on the screen after all the statements below are executed?

```
var my_result = 5;  
my_result = my_result + my_result;  
my_result /= 0;  
document.write(my_result);
```
